

Outdoor Radiant Heaters – Electric

Rinnai

Relax. It's a Rinnai.

Relax with Rinnai Outdoor Radiant Heaters.

The Rinnai Outdoor Radiant Heater range offers the latest technology in premium, outdoor electric heating.

Driven by the desire to design products that not only look good but are functional too, Rinnai offer yet another solution to help you lead a more comfortable life and enjoy the things you love, like outdoor entertaining!

Whether you want to barbeque all year round, or simply enjoy a nightcap on the deck with a loved one, the Rinnai Outdoor Radiant Heaters allow you to make full use of your space regardless of the weather.

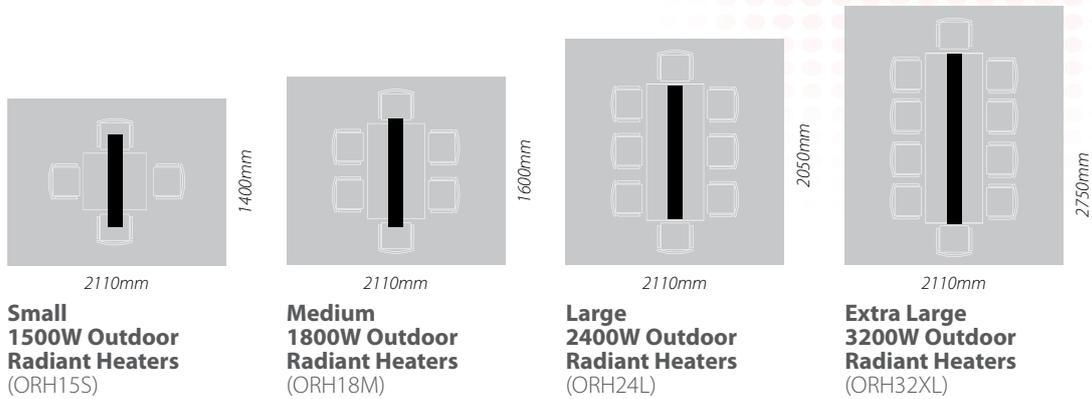

The infrared energy these heaters use to provide warmth is inspired by the sun; sending down beams of heat that radiate warmth directly to objects and people, rather than blowing hot air like a traditional heater. The result is a relaxed, ambient atmosphere created by pleasant and gentle warmth.

Features and Benefits

- > Cosy, radiant heat creates an even blanket of warmth
- > Engineered for the harsh Australian environment with class leading protection from dust and rain (IP65).
- > Clever design with a light indicator to show on/off status
- > Ideal for various enclosed applications, such as covered alfresco entertaining areas, balconies, sheds, garages, courtyards or pool side.
- > High quality, corrosion-resistant materials designed to maintain the stylish appearance throughout years of use
- > Cost-effective heating solution
- > Reliable Rinnai quality backed by a 3 year domestic use warranty

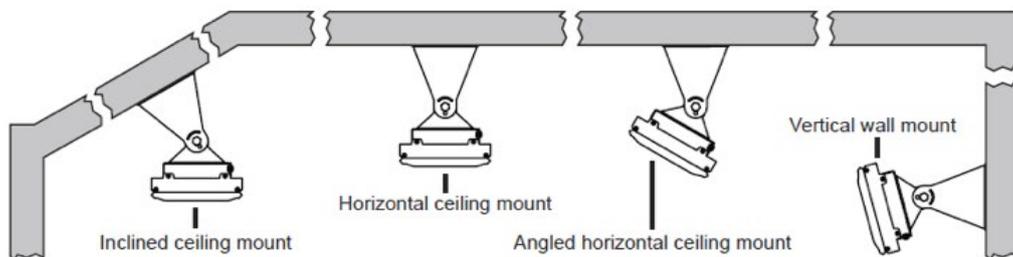

Outdoor Sizing Options

When deciding what size is most suitable for your area, it's important to remember how these heaters work – by providing direct warmth to objects and people in its path. For instance, you may have a large space but really only use the area around your outdoor furniture, therefore it would be more efficient to heat the area around the furniture as opposed to the entire space.

The Rinnai Outdoor Radiant Heaters are recommended for use in covered alfresco areas. When the temperature drops and you're not ready to put an end to your evening on the deck or patio, the Rinnai Outdoor Radiant Heater range of products are perfect to keep the good times rolling and provide comfortable heat almost instantly. However, for those areas that are exposed to the elements on a chilly mid-winter night, the electric range of Rinnai Outdoor Radiant Heaters may not be suitable.

Mounting Options

Mounting brackets are included with your purchase for easy installation in a variety of positions. Depending on the area and the available space, you may want to mount the heater on either the wall or the ceiling.
